EDUCATION

University of Oklahoma - Michael F. Price College of Business **Expected May 2027**
Bachelor of Business Administration | Management Information Systems
University of Oklahoma - Gene Rainbolt Graduate School of Business **Expected May 2027**
Master of Science | Management of Information and Technology
GPA: 3.70

WORK EXPERIENCE

Love's Travel Stops, The Village, OK **May 2026 - August 2026**
Information Technology Intern

- Built a Power BI cost monitoring and forecasting dashboard for the company's SAP BTP cloud platform, turning a raw monthly billing export of thousands of rows into a spend trend view, a live current-month tracker, and year-end cost forecasts used for budget planning.
- Prototyped a Microsoft Copilot Studio intake agent to standardize how end users report SAP issues, generating structured summaries to support incident triage.
- Designed and distributed an employee feedback survey, analyzed response data, and built an Excel dashboard with data visualizations to report insights and recommendations for improving the Heart of Love's recognition program and driving enterprise-wide adoption.

PCI Energy Solutions, Norman, OK **June 2025 - August 2025**
Software Analyst Intern

- Supported the development and maintenance of the company's Markets+ CustomGPT AI chatbot by curating and updating technical documentation related to SPP (Southwest Power Pool) Markets+ processes.
- Increased chatbot engagement by 60% through enhancements in content relevance, user experience, and documentation updates.
- Built and organized Excel stakeholder databases for SPP Markets+ roundtables, improving visibility, collaboration, and alignment across industry participants.

PROJECTS

Chickasaw Nation Case Competition | Python & Power BI **January 2025 - April 2025**

- Analyzed customer behavioral data, including trip frequency, free play redemption, demographics, and churn indicators to develop predictive insights.
- Built Power BI dashboards and reporting visuals to communicate key analytics findings, trends, and strategic recommendations to stakeholders.
- Developed a machine learning model using historical customer data to predict churn and support data-driven decision-making.

LEADERSHIP EXPERIENCE & ACTIVITIES

JCPenney Leadership Program, Norman, OK **September 2024 - Present**
Associate

- Selected for a competitive leadership initiative for high-performing business students, focused on strategic development and professional growth.

Asian American Student Association, Norman, OK **August 2023 - Present**
President **(May 2025-May 2026)**

- Managed a 20+ person executive board and led events of 200+ attendees; directed fundraising, outreach, and communications to increase community impact and member retention.
- Developed advanced leadership, problem-solving, organization, adaptability, team collaboration, and communication skills with a team of 20+ people.
